
NEJM Knowledge+ combines gold standard content with state of the art adaptive technology

BOSTON, Mass. – April 16, 2014 – NEJM Group, the organization behind The New England Journal of Medicine and NEJM Journal Watch, has launched NEJM Knowledge+ Internal Medicine Board Review, a self-assessment and continuous learning solution that employs the very latest adaptive learning technologies to increase learning efficiency and knowledge retention. The product is designed specifically for Internal Medicine and Internal Medicine subspecialists.

NEJM Knowledge+ Internal Medicine Board Review includes:

• Over 4,000 questions covering nearly 1,500 learning objectives;
• A simulated exam environment with two, timed 2-hour practice exams;
• Desktop, iPad, iPhone support options;
• Opportunity to earn AMA PRA Category 1 Credits™ and MOC points toward the American Board of Internal Medicine’s Self-Evaluation of Medical Knowledge (Part 2) requirement with automatic, paperless submission; and
• Robust, multi-faceted progress and performance reporting system.

“The challenge in improving medical education today is working with increasingly time constrained clinicians”, says Graham McMahon MD, Executive Editor of NEJM Knowledge+. “We decided that the best way we could help was to deliver an educational tool that was both effective and efficient”.

NEJM Group partnered with Area 9—a physician-led pioneer in adaptive learning — to create a first-of-its-kind platform with smart technology that adapts to clinicians’ learning goals, pace and knowledge gaps to deliver the information they need to know. The system uses research-proven methods to accelerate proficiency, continuously sharpen skills and promote true lifelong learning. For an informative look at how this product uses adaptive learning, view this animation.

NEJM Knowledge+ is planned as a family of products to support self-assessment, learning and board certification in internal medicine and other specialties. Future review products in other specialties will all be designed to help clinicians efficiently self-assess their learning needs, meet their certification requirements, prepare for their board exams, and incorporate lifelong learning into their schedules more easily. NEJM Knowledge+ Internal Medicine Board Review will support physicians as they start earning points for the American Board of Internal Medicine’s new maintenance of certification requirements that went into effect January 1, 2014.

“The launch of NEJM Knowledge+ Internal Medicine marks a milestone for NEJM Group as we extend our brands to deliver on our mission of advancing knowledge, learning, and practice to improve patient outcomes,” says NEJM Group Editor-in-Chief Jeffrey M. Drazen MD.
